PROFILE SUMMARY

PHP Developer with **2+ years of experience** in designing, developing, and maintaining PHP based applications. Skilled in building RESTful APIs and web applications using PHP and MySQL. Proficient with Git, object-oriented principles, design patterns, and Agile/Scrum methodologies. Focused on delivering scalable, maintainable, and high-performance backend solutions.

EXPERIENCE

Ajatus Software Pvt. Ltd. Jan 2024 – Present
Software Developer Bhubaneswar, India

- Devised and optimized relational databases, **boosting data retrieval efficiency by 20%** while ensuring scalability and performance
- Built and maintained web applications, collaborating with cross-functional teams to deliver robust, scalable Erp-based solutions
- Diagnosed and resolved software bugs, **enhancing application stability and reducing downtime by 15%**

PROJECTS

GIOVANI ERP *Team Size: 06)*

- Developed and maintained modules for sales, inventory management, and customer data in a Yii2-based ERP system.
- Designed and optimized RESTful APIs, **reducing average API response time by 25%** for centralized storage of business information, including sales, purchases, and inventory.
- Improved system performance with asynchronous event handling, efficiently managing 50+ concurrent requests
- Contributed to API and database design, ensuring scalability for 2x user growth and secure data flow
- Implemented Jenkins CI/CD pipelines, **reducing deployment errors by 30%** and deployment time by 20%
- Delivered unit-tested, production-ready modules, meeting 100% of project deadlines

MSIL Mohapatra Scientific *(Team Size: 4)*

- Integrated e-Invoice system into a custom ERP built with PHP streamlining GST compliance and real-time invoice validation.
- Developed and optimized core ERP modules including Sales Orders, Purchase Orders, and dynamic reporting, improving operational efficiency.
- Worked across server-side logic and database architecture, ensuring secure data handling and performance tuning for high-volume transactions.
- Managed end-to-end deployment of web applications on Linux-based AWS servers, with hands-on experience in CI/CD pipelines to ensure seamless integration and reliable delivery.

EDUCATION

Biju Patnaik University of Technology 2020 – 2024
Bachelors of Technology (CGPA: 8.00) Odisha, India

SKILLS

Programming Languages: PHP, Python, JavaScript, HTML, CSS
Frameworks & Libraries: Code Igniter, YII2, Laravel
Cloud Technologies: AWS (EC2, RDS, S3, IAM), Docker, Linux
Databases: MySQL, PostgreSQL
Tools & Others: Git, Apache, Nginx, Jenkins, VS Code, Canva, Figma
Methodologies: Agile, Scrum
